

Pro AI is an Artificial Intelligence Consultancy aimed at showing what is possible using new software technologies.

We are reaching out to accountancy firms and organisations to partner. The partnership would allow the accountants clients access to consulting and development of technology solutions.

## What Is AI?

AI refers to multiple areas of software that has 'intelligent' outputs. It can be used for the following:

- Prediction of sales/ demand
- Quickly analysing images or videos
- Helping customers
- Reporting
- Automating processes
- Analysing audio
- Saving information automatically
- And much more...

## What Industries does it apply?

Artificial Intelligence can be applied to most industries and add value by:

- Reduces losses
- Increases efficiency
- Reduces labour costs
- Improves customer engagements
- Improves reporting
- Analyses more accurately
- Saves time
- Processes large amounts of data
- Adds value
- Automates

A partnership could be mutually beneficial for your firm and clients.  
We look forward to discussing in more detail.
